

**Dear I-Traders :**

As we know, Artificial Intelligence, Big Data, and the Internet have become worldwide trends, and global industries are all closely related to these three major trends. The revolution of blockchain technology is rising rapidly, and the world is shifting to a “Blockchain Era” at a high speed. First Union Capital not only focuses on implementing our strategic planning for the Asia-Pacific region but is also actively expanding our business models.

We’ re delighted to announce that First Union Capital Group has established a strategic partnership with STORM PROTOCOL, a well-known blockchain-based data platform in the United States.

Through the partnership with STORM PROTOCOL, our AI system will have access to a richer and larger amount of information, which will make our Big Data analysis closer to the current market relation, and enable the Unicorn Trading System to make much more accurate profit-making decisions.

SP Token, the only utility token issued by STORM PROTOCOL exclusively for the platform, is expected to be issued and listed on international exchanges in December 2021 with a total mintage of 88,000,000,000 tokens. The CEO of First Union Capital is very optimistic about the future of STORM PROTOCOL, therefore, we have acquired more than 30% of the total issue of SP tokens. With the combination of the Unicorn Trading System and data tokenization, we will create a full-fledged intelligent financial life circle.

I'm convinced that with the expansion of the First Union Capital and STORM PROTOCOL, and the development of data ecology, the value of the SP token will rise rapidly, and it will become the preferred choice of cryptocurrency investment. And we will be sharing the appreciation profit of the SP token with all our I-Traders family.

The partnership between First Union Capital Group and STORM PROTOCOL will lead us all to unprecedented achievements, we look forward to witnessing our success with you, thank you!

FIRST UNION CAPITAL CEO

2021. 12. 15
